

The secret to improving your playing
is simple...

You practice!

But, not just practice - you have to:

- 1) Practice the right things
- 2) Focus on the things you want to improve
- 3) Work on one single topic with dedication
- 4) Get feedback - either from a teacher or yourself by listening back to a recording of your playing (audio or video or both)
- 5) From the feedback, decide on the next thing to practice.
- 6) Repeat (1) to (5) forever
- 7) Follow the process, trust the process and be patient

The problem is most people spend more time looking for a secret answer than actually working on your problem. It takes work to improve. It takes practice and it takes time.

Do the work.
